

National Survey results for True North

December 2021

Methodology

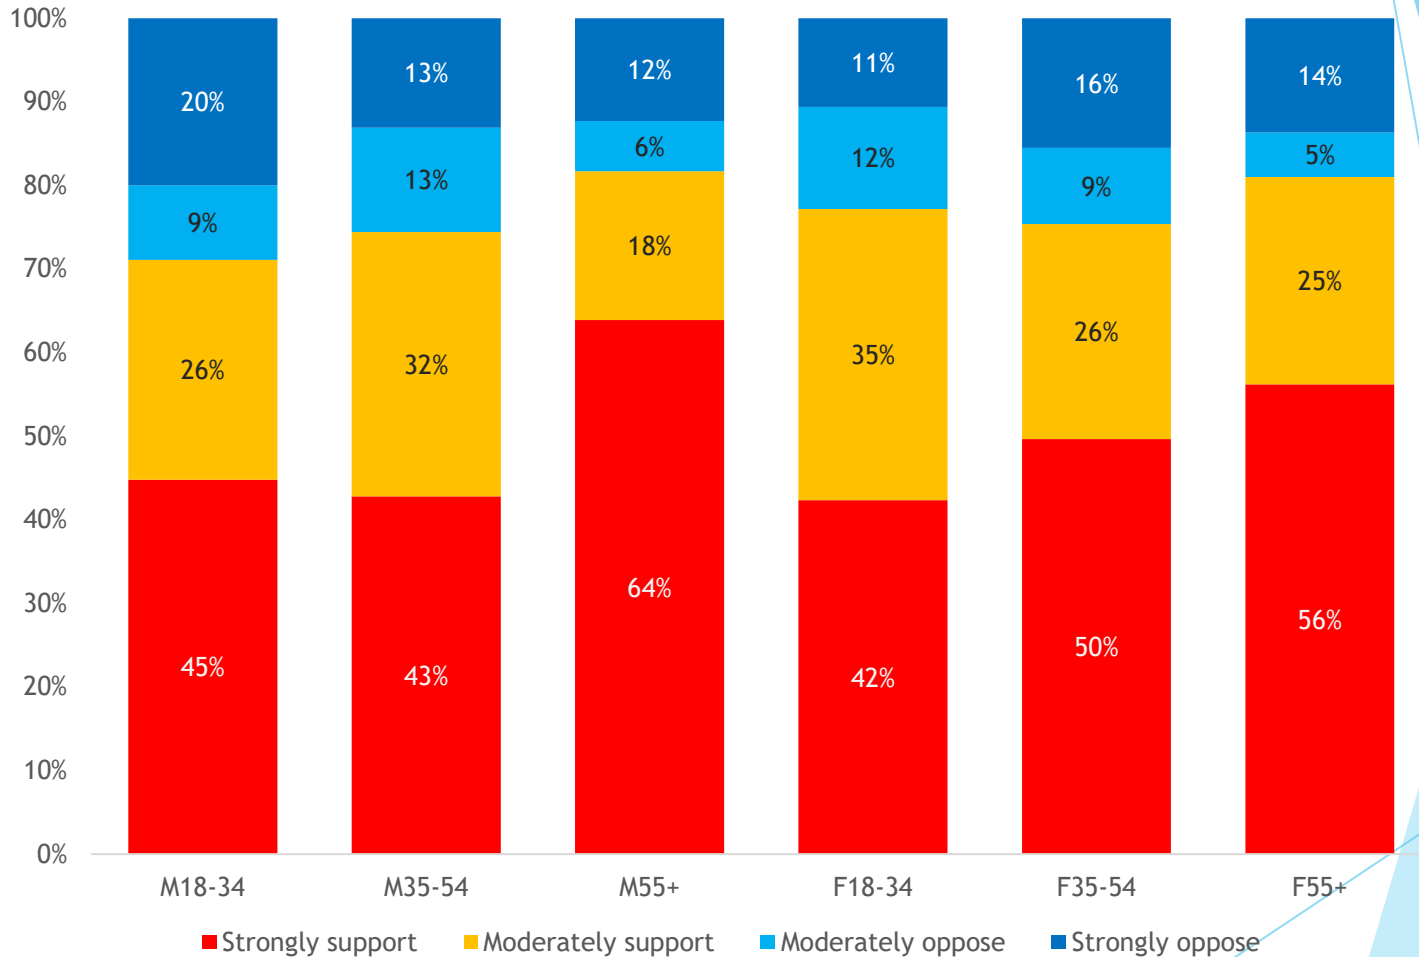

- ▶ 1,013 Canadians adults were surveyed online using a national representative panel in English and French
- ▶ The survey was conducted from December 2 to 4, 2021
- ▶ The margin of error is +/- 3.1%, nineteen times out of twenty
 - ▶ Subgroups have larger margins of error
- ▶ The results have been weighted for accuracy by age, gender, language spoken at home, region and past federal vote using the most recent census data from Statistics Canada.

Covid vaccinations for kids by region and language

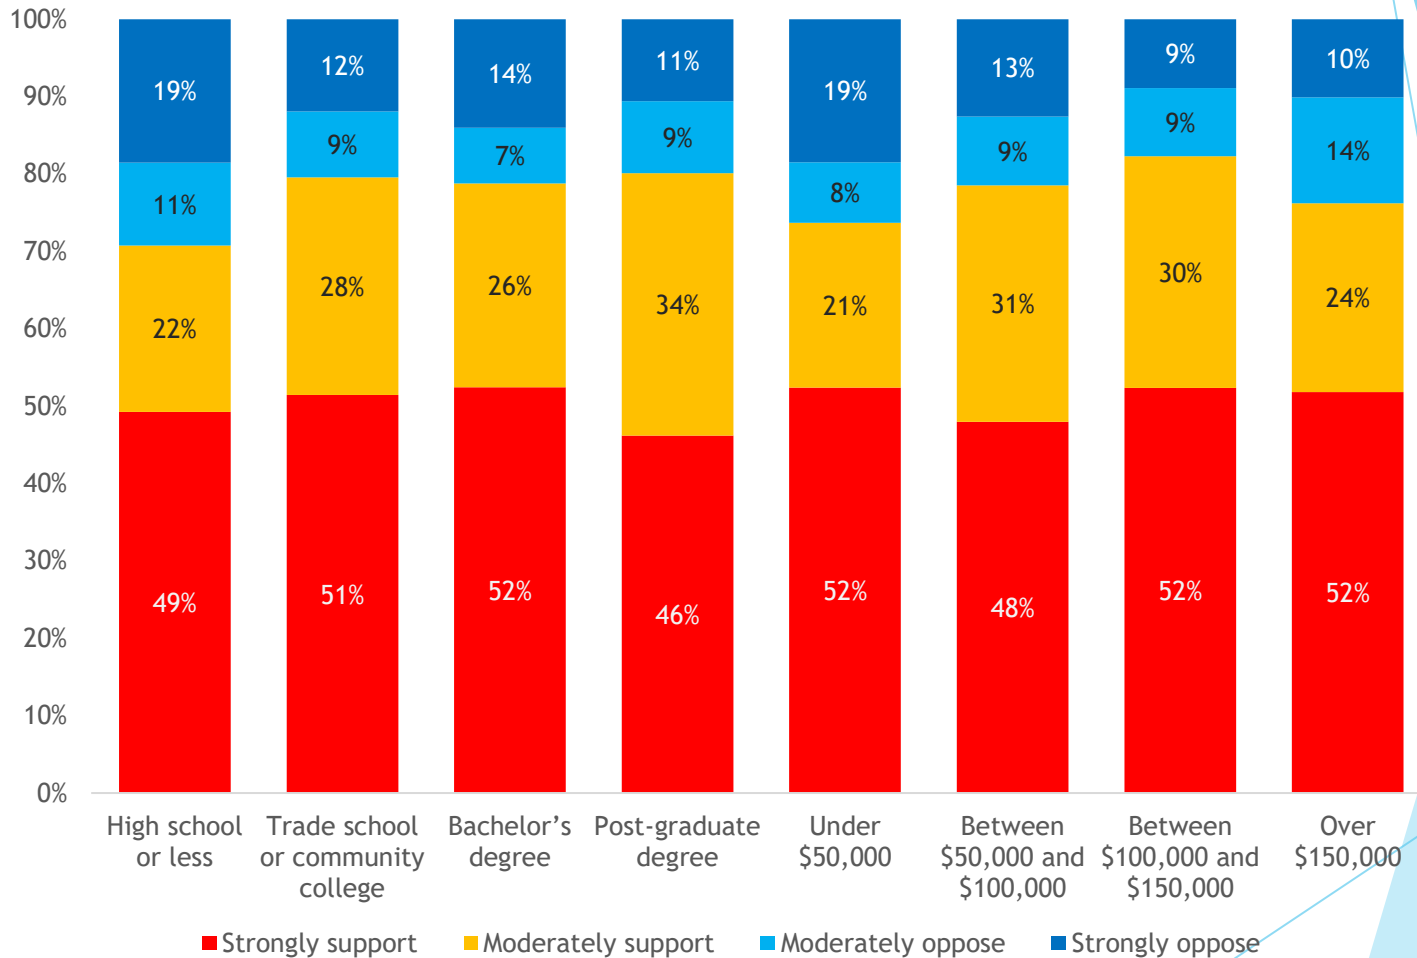

Children in Canada between the ages of 5 and 11 are now eligible for COVID-19 vaccines. Some people say that children should be vaccinated because they have the highest infection rate. Other people say it's not necessary since covid mortality is very low in children, even lower than the seasonal flu. Do you support covid-19 vaccinations for children 5 to 11?
